DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas N. Giaccherini on May 13, 2005.

The application has been amended as follows:

In The Claims

1. (Currently Amended) A method for on-demand use of preselected content by a recipient, comprising the steps of:

utilizing the excess capacity of a network by conveying data over said network during a period of less than maximum usage;

receiving and storing said data at a customer's premises during said period of less than maximum usage;

accumulating said data over an extended period of time;

selectively retrieving said data by said recipient for on-demand use at a time after said extended period of time.

Allowable Subject Matter

2. Claims 1-26 are allowed.

The following is an examiner's statement of reasons for allowance:

Art Unit: 2667

The prior art does not teach or fairly suggest selectively retrieving the data, already received and stored at a customer premises, by a recipient for on-demand use at a time after an extended period of time of accumulation, as specified in independent claim 1.

The prior art does not teach or fairly suggest selectively retrieving and using said plurality of digitized packets of data after a generally full program has been accumulated in a receiver's storage over an extended period of time from the relay means; whereby, the relay means only retransmitting the digitized packets of data of the program during a time period when the total communications capacity of the relay means is not fully used for other data transmissions, as specified in independent claim 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

O'Connor (US Patent No. 6,072,808) discloses method of providing and retrieving a data segment.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anh-Vu H. Ly whose telephone number is 571-272-3175. The examiner can normally be reached on Monday-Friday 7:00am - 4:00pm.
